# HealthTALK

WINTER 2020 | ¡VOLTEE PARA ESPAÑOL!

## Did you know?

Your State Medicaid Benefit requires you to renew your health insurance every year. It is called recertification. If you do not review, your coverage will end. To renew today, simply call **1-855-632-7633**. Or renew online at **ACCESSNebraska.ne.gov**.

## A healthy start.

### Schedule your 2020 annual well visit.

Checkups aren't just for kids. Get off to a good start this year by scheduling an appointment with your primary care provider (PCP).

All the members of your family should see their PCP once a year for a well visit. You will get any tests or shots that are needed. Your PCP can look for problems that often don't have symptoms.

Your PCP is your partner in health. An annual well visit gives you the chance to talk to them about what's important to you. Tell them about any health concerns you have. Ask questions. Together, you can make a plan and take charge of your health.

**Need a new PCP?** We can help you find a provider who is a good fit for you. Visit **myuhc.com/CommunityPlan** or call Member Services toll-free at **1-800-641-1902, TTY 711**.

Omaha, NE 68164

## Heart smart.

Coronary artery disease (CAD) is the most common form of heart disease in the United States. It is caused by a buildup in the arteries. It can cause many other heart problems, including heart attack.

What can you do to prevent CAD? A healthy lifestyle can help manage heart diseases like CAD. This can include:

- Healthy eating. Your diet should include foods such as fruits and vegetables, whole grains and foods that are low in sodium.
- Daily exercise.
- Medication (if recommended by your provider).
- Quitting smoking.

Symptoms of CAD include chest pain, abnormal heart rhythms or heart failure. Talk to your provider if you have any of these conditions.

# Beyond the winter blues.

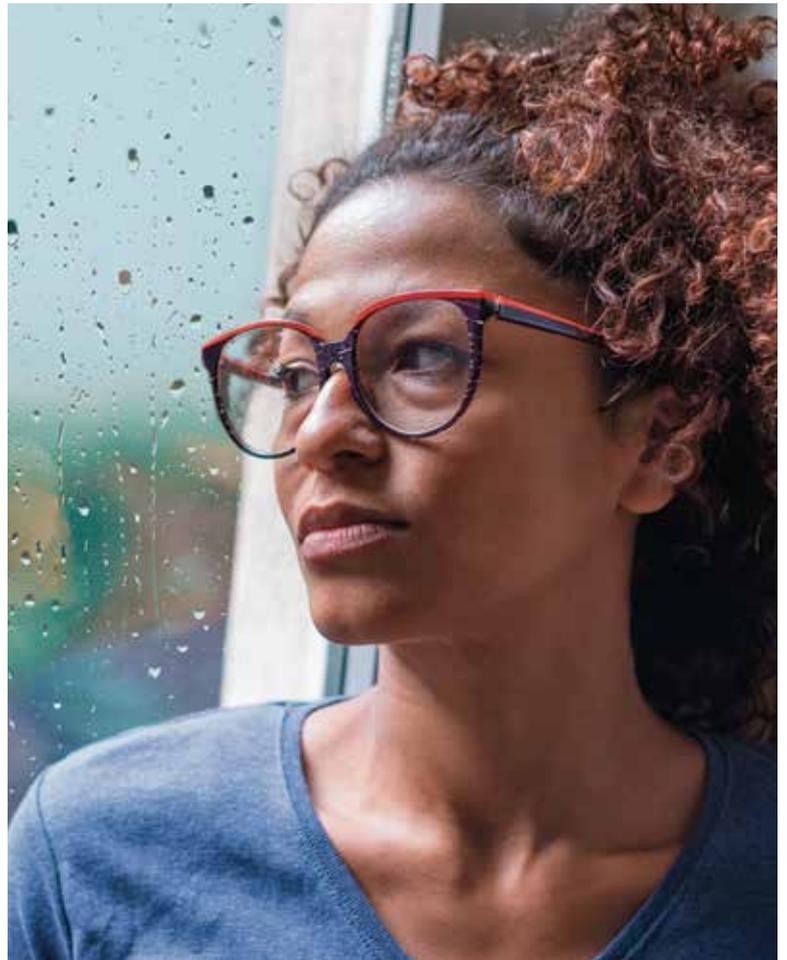

## Self-care for Seasonal Affective Disorder.

Seasonal Affective Disorder (SAD) is a form of depression. People get SAD mostly during the cold, dark winter months. Symptoms include sadness as well as irritability, oversleeping and weight gain. If you think you have SAD, try these self-care tips:

- **Use a light box.** Light boxes mimic the sun. Ask your provider if this might be right for you.
- **Exercise.** Physical activity has been known to improve mood and relieve stress. Even moving your body in short bursts throughout the day can be helpful.
- **Spend time outdoors.** Outdoor light can help you feel better, even on cloudy days. Take a walk outside. When indoors, sit close to windows if possible.
- **Take vitamins.** SAD has been linked to vitamin D deficiency. Talk to your doctor about vitamin D or other supplements.

**Are you SAD?** If your symptoms don't improve with self-care, talk to your provider. You may benefit from talk therapy or antidepressants. For information on using your behavioral health care benefits, call Member Services toll-free at **1-800-641-1902, TTY 711**. Or visit **LiveandWorkWell.com**.

## Abuse can happen to anyone.

Domestic abuse affects millions of women, men and children each year. It occurs when one person in a relationship tries to control another. It can happen to anyone. It doesn't matter if you are young or old, male or female, gay or straight, rich or poor, black or white.

Abusers may physically hurt their victims. But abuse isn't always physical. They can also do other things to make you afraid. They may keep you from seeing friends or family, or not let you have enough money. You may be a victim of domestic abuse if your partner or caregiver:

- Hurts you with words or physical force.
- Uses sex to hurt you.
- Uses money to control you.

**Get help.** If you are being abused, call the National Domestic Violence Hotline at **1-800-799-SAFE (7233), TTY 1-800-787-3224**. Help is free and confidential. If you are in immediate danger, call **911**. You can also learn more about domestic violence at **thehotline.org**.

## Rest easy.

### Treating cold and flu symptoms.

Flu and cold season is in full swing. These illnesses often come on suddenly in the cooler months.

The flu can cause a cough, a sore throat and a stuffy nose. You might also have a fever and feel achy and tired. Some people get a headache or an upset stomach.

There is no cure for the flu. But self-care can help you feel a little better until it passes. Follow these tips for a more comfortable recovery:

- Take a fever reducer/pain reliever.
- Get plenty of rest.
- Drink lots of water.
- Stay home from work or school to keep from giving the illness to others.

**Know your provider.** See your primary care provider (PCP) for a checkup before you get sick. Need to find a new PCP? Visit **myuhc.com/CommunityPlan** or call Member Services toll-free at **1-800-641-1902, TTY 711**.

## Before baby.

Are you thinking about becoming pregnant? To have a healthy pregnancy and baby, it's important to take care of your health before you get pregnant. Planning for a baby is the perfect time to:

- Quit smoking or taking recreational drugs.
- Cut down on alcohol and caffeine.
- Get chronic health conditions under control.
- Eat healthier foods.
- Exercise more.
- Start taking a prenatal vitamin containing folic acid, calcium and iron.
- Find out if genetic testing is right for you.

Once you are pregnant, it's important to have regular checkups with your doctor. You should have your first visit before your 12th week of pregnancy.

## The vape debate.

Most teens and adults know that smoking and other tobacco use is dangerous. But what about vaping? Vaping tools use electricity to turn flavored liquid into vapor. These include vape pens, electronic cigarettes and hookah pens.

Vaping may seem fun and harmless. But many health professionals agree that vaping can be harmful to the body.

The best way to quit smoking or stop using vaping tools is never to start. If you smoke and want to quit, vaping is not a good option. There's no proof that vaping is safe or successful at helping smokers quit. Talk to your primary care provider about proven methods to stop smoking.

**Quitting time?** You can quit smoking and vaping for good with the right help. Get telephone support and information by calling the Nebraska Tobacco

Quitline at **1-800-784-8669, TTY 711**. Or get free help online at **QuitNow.ne.gov**.

## Testing for lead.

Lead is often found in plumbing or paint in older homes. It can also be found in painted toys made outside of the United States. Because babies and toddlers often put their hands and toys in their mouths, they can swallow lead. They can also inhale it.

When lead gets into the body, it can end up in the blood, bones or organs. Too much lead in a child's body leads to lead poisoning. It can result in slow growth or developmental problems.

Many children with lead poisoning don't have symptoms. That's why testing is important. Experts recommend testing at ages 1 and 2. Lead testing is part of a checkup at these ages. The test is done using a few drops of blood.

**Schedule your screening.** Does your child need to be tested for lead? Ask their doctor. If you need help finding a new provider, we can

help. Call Member Services toll-free at **1-800-641-1902, TTY 711**.

UnitedHealthcare Community Plan does not discriminate on the basis of race, ethnicity, color, religion, marital status, sex, sexual orientation, age, disability, national origin, veteran status, ancestry, health history, health status or need for health services.
